

Our mission is to be a resource to support people with intellectual and developmental disabilities and their families so that they can live, learn, and grow in their community; experiencing dignity, respect and fulfillment.

Our vision is to expand our reach into the community to create more resources for individuals and families impacted by intellectual and developmental disabilities. Agency representatives will use every opportunity afforded to them to improve the quality of life and advocacy skills while raising awareness and promoting the value of community inclusion.

More about The Arc's Services...

Family and Community Support Services provide one to one support to families and individuals who need support to obtain services, IEP and 504 support and advocacy, one to one support and training with things like accessing DDA services, social security benefits, transition, guardianship and other related community and state services.

Parent 2 Parent is a powerful network that fulfills a crucial role in the adjustment of a family to their child with a disability. We provide support, connection to other parents and resources for families of children with developmental disabilities and healthcare needs.

Community Access: Services can be short or long term and are designed to increase an individual's connection to and engagement in formal and informal community networks and supports that result in positive relationships, valued community roles, and involvement in preferred community activities, organizations, groups, or projects.
